Re: **Addendum No. 4**

Memorial Fields  
Tee Ball and Softball Field Reconstruction

Dear Bidders:

The contents of this Addendum are to clarify a specific depth of material across the field and specify specific materials to be used.

The edge of the infields, where they meet the grass, should be flush as detailed on C110. The infields then need to be built up to slope to the pitchers' mounds, with a constant slope as indicated on the detail. The infield should have 4" of the infield sand mix over the entire area, and if more than 4" is needed, it should be built up with the coarse sand below the 4" of the infield mix. Refer to Note 16 and the note on the lower right side of the Infield Edge and Surface Detail on drawing C110 for additional information.

#### **LIST OF ATTACHMENTS**

1. None. Refer to Addendum 1

**- END OF ADDENDUM -**

All other provisions of these Specifications, Drawings, and Contract Documents shall remain unchanged and in full effect.

This Addendum shall be signed and attached to the Form of Proposal for the referenced contract. This Addendum shall also be attached to and become part of the Specifications for this Contract.

Sincerely,

Matthew Koenigsberg, P.E
